

MODSIM

Unify modeling and simulation with 3DEXPERIENCE Cloud

Design

with CATIA's powerful solutions for design creativity, surface refinement and product experience

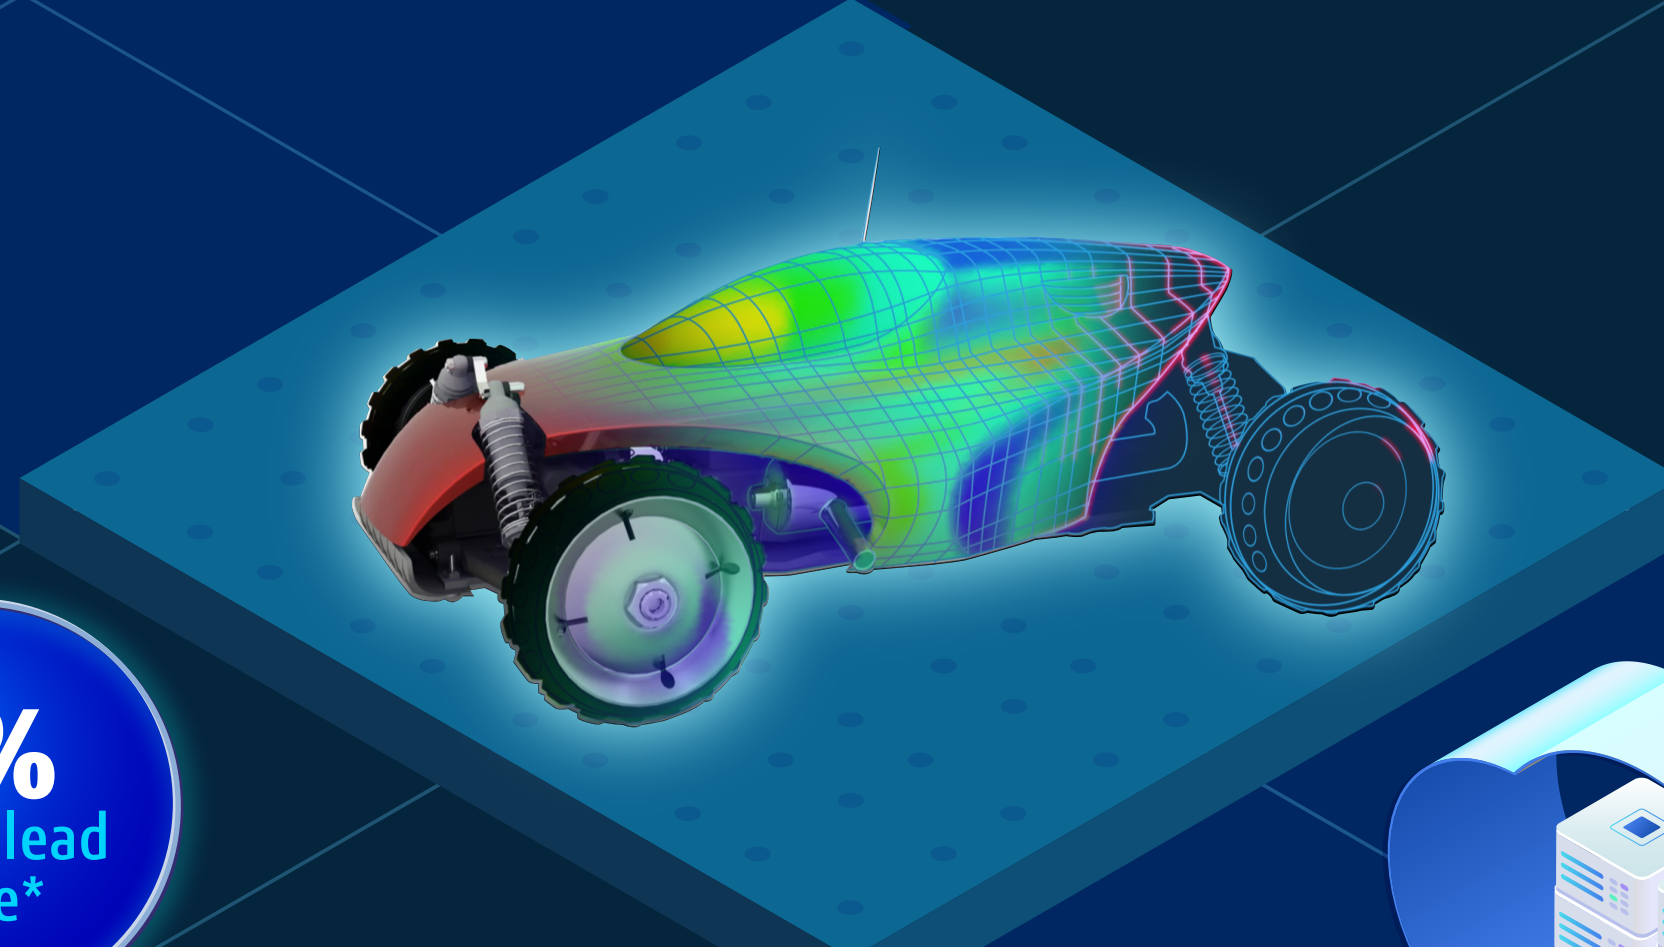

85%
faster lead time*

Simulate

early and frequently in the design process to gain insights into key performance metrics

Standardize

all engineering subsystems—including mechanical, fluid and electrical

5%
faster lead time*

Converge

CAD, analysis and design controls to rapidly optimize designs and get them right the first time

Connect and collaborate

anytime, anywhere in a single cloud-native environment for design modeling, requirements, review, controls and simulation

Reduce or eliminate

physical testing and prototyping with 3DEXPERIENCE SIMULIA

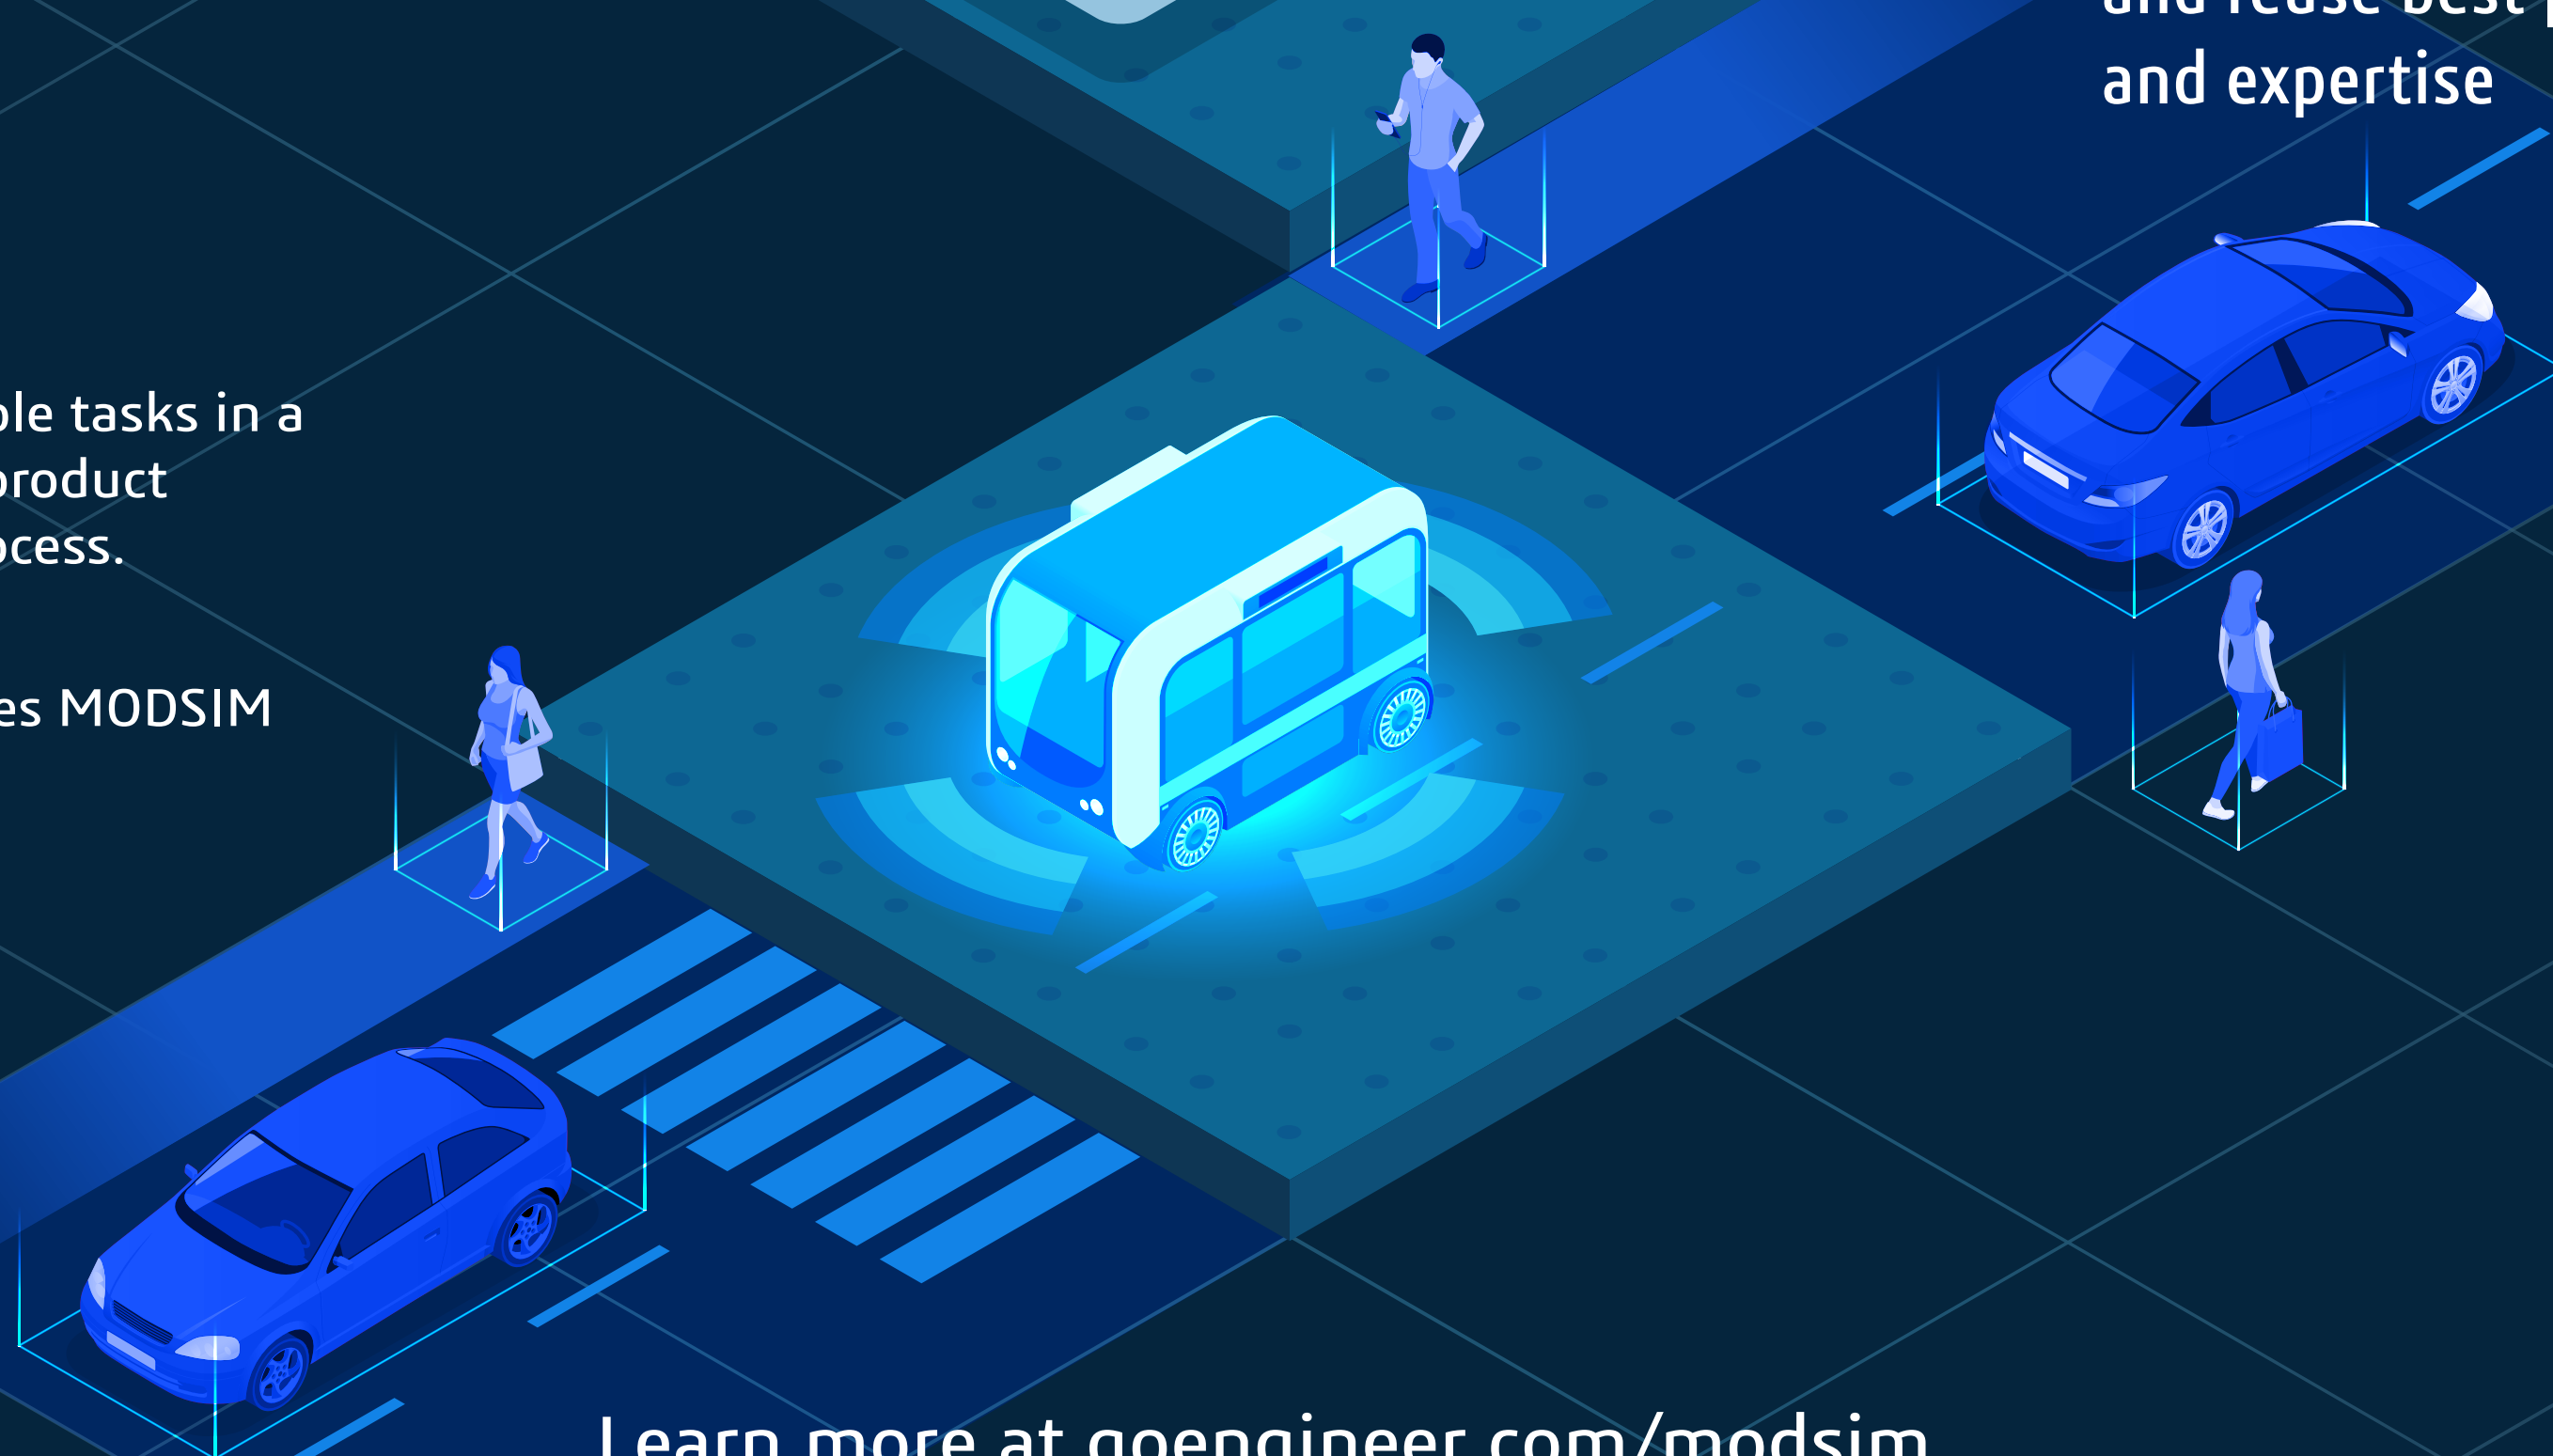

Automate

engineering tasks with templates to capture, store and reuse best practices and expertise

30%
faster lead time*

*Versus comparable tasks in a non-integrated product development process.
